

Executive Biography

Scott Creed

Vice President, Strategic Solutions

In his role of vice president of strategic solutions, Scott Creed works with a wide spectrum of SolArc teams, including sales, engineering and delivery to define new functionality, packaging and delivery models.

Prior to taking responsibility for strategic solutions, Creed served as the vice president of software development where he led a team of more than 40 developers in designing, developing, maintaining and managing quality assurance practices for SolArc's RightAngle platform. During his tenure in that role, he and his team enhanced the platform by adding financial instruments and risk management tools, and expanded its capabilities to serve customers focused on crude and refined products.

Prior to that role, Creed was the chief architect for the scheduling functionality on the platform development team. He joined SolArc in 1994 as a senior business analyst in SolArc's consulting business and is a certified software development instructor.

Prior to joining SolArc, Creed worked at Monsanto Chemical, building quick-hit applications with a select IT "SWAT" team.

Creed graduated from Washington University in St. Louis with a bachelor's degree in computer science.
